Objective

I am a recent graduate with a BSc in Information Technology. I am passionate about creating seamless, visually appealing, and highly interactive user interfaces that offer a smooth and user-friendly experience. Through my academic background and hands-on practice, I have developed a solid understanding of front-end technologies such as HTML, CSS, JavaScript, and modern frameworks. My goal is to apply these technical skills and design sensibilities in an entry-level Front End Developer role at a reputable organization where I can contribute to building innovative, accessible, and performance-oriented websites and applications. I am eager to kick-start my career in a collaborative environment, learn from experienced professionals, and further hone my abilities to deliver captivating user interfaces that align with both user needs and business objectives.
